✅ Quiz M7.03

> ℹ **Question**
>
> How to evaluate and tune the hyperparameters of a model?
>
> - a) Fit the model on the train set, set the parameters using the test set, and evaluate the model on the same test set
> - b) Fit the model on the train set, set the parameters using a validation set, and evaluate the model on the test set
> - c) use a nested cross-validation, with an inner cross-validation to tune the parameters of the model and an outer cross-validation to evaluate the model's performance
